

Black Sand Neuropsychological Services, Inc.

Does your child have learning or developmental challenges?

Lorraine R. Freedle, PhD, ABPdN, ABSNP Pediatric Neuropsychologist

Dr. Freedle offers highly specialized and comprehensive neuropsychological evaluation and consultation services to provide specific information about your child's brain development along with individualized strategies to help your child learn and succeed in life. Dr. Freedle combines her background in social work, education, behavioral health and neuropsychology to create a thorough, child-centered, systems approach to neuropsychological evaluation. She is committed to helping all of those who work with your child to develop informed, strength-based interventions to best meet your child's unique needs.
